**IMPORTANT:** Static Converters do not produce constant 3-phase power; they “jump-start” your 3-phase motor to run on single-phase power. Be sure to read all information provided. \*Refers to wye-wound motors; delta-wound motors will run at 50% rated HP. Delta-wound motors are very rare in the USA.

[HIGHLY EFFICIENT PERFORMANCE] The output frequency ranges from 0.1 to 400Hz with customizable V/F curve and . [INNOVATIVE FEATURES] Automatic torsion boost, slip compensation, and support for communication modules DN-02

LN-01 PD-01. [CONVENIENT FUNCTIONS] Includes 0 speed hold, sleep/wake.
