

Panama EK solar module project

Overview

Why is Panama launching a solar park?

Panama formally inaugurated the Santiago Solar Park, a \$70 million investment by the Naiad Renovables Group with a capacity to produce 86,333 megawatts peak (MWP), providing a new boost to renewable energy in this country, where the photovoltaic and wind energy segments accounted for 12.9% of total electricity generation in 2024.

How many solar installations are there in Panama?

According to data from the Public Services Authority (Asep), there are at least 49 solar installations in Panama that will produce 7.7% of the country's total electricity by 2024.

How many solar panels does EGP have?

It spans approximately 33 hectares and will have an installed capacity of 31 megawatts. It will be equipped with a total of around 70,000 solar panels. This is EGP's tenth solar plant in Panama, and the company is the leading renewable energy operator in this Central American country.
