

Paris PV module prices

Overview

April saw nuanced but key price shifts in the European solar market, with module prices rising due to supply constraints, while inverter prices continued to decline. The PV Purchasing Managers' Index (PMI) remained steady at 70.

April saw nuanced but key price shifts in the European solar market, with module prices rising due to supply constraints, while inverter prices continued to decline. The PV Purchasing Managers' Index (PMI) remained steady at 70.

Every month we publish a current price index on the development of wholesale prices of solar modules. In doing so, we differentiate between the main technologies available on the market. Since 2009, pvXchange has provided a unique price index for the European market, which has become an invaluable.

*Notice: Starting January 2026, prices for TOPCon high-efficiency modules (640W and above) will be newly included in weekly price updates. Polysilicon No transactions have been concluded at new InfoLink's polysilicon price quotes exclude additional costs from special specifications or requirements.

Through detailed survey cross-survey of data from major suppliers and procurement parties, Green Energy Research is able to provide an accurate weekly report on spot prices of key PV components. Green Energy Research can also quickly produce a detailed market analysis for a VIP client, as its staff.

The updated guide to photovoltaic module prices shows the latest costs of solar panels across Europe. In August, high-efficiency modules dropped to €0.12 per watt, marking an all-time low for the sector. Prices for photovoltaic modules in 2024 continue to fall. According to the monthly index.

Note: Data is expressed in constant 2024 US\$ per watt.
OurWorldinData.org/energy | CC BY IRENA presents solar photovoltaic module prices for a number of different technologies. Here we use the average yearly price for technologies 'Thin film a-Si/u-Si or Global Price Index (from Q4 2013)'. This.

April saw nuanced but key price shifts in the European solar market, with module prices rising due to supply constraints, while inverter prices continued to decline. The PV Purchasing Managers' Index (PMI) remained steady at 70. As stock

shortages increase, partly due to China's shift towards. How much does a photovoltaic module cost?

Mainstream Modules: Average price of €0.11/Wp, stable compared to September but 21.4% lower than January 2024. Low-Cost Modules: Average price of €0.065/Wp, a 7.1% decrease from September and 27.8% from January 2024. These trends are exerting mounting pressure on the photovoltaic sector.

What is the PV module price index?

The PV Module Price Index tracks wholesale pricing and supply of crystalline-silicon modules that have fallen out of traditional distribution channels, and as a result are listed for resale on the EnergyBin exchange.

Do PV modules lose resale value?

For historical secondary market PV module pricing from 2020 through 2023, download the 2023 PV Module Price Index from EnergyBin's Resources portal. Overall, the price index shows that new PV modules don't tend to lose resale value in the U.S. secondary market unless their technology is older, such as Legacy POLY modules.

How much does a module cost in 2024?

High-Efficiency Modules: Average price of €0.14/Wp, down 6.7% from September 2024 and 39.1% from January 2024. Mainstream Modules: Average price of €0.11/Wp, stable compared to September but 21.4% lower than January 2024. Low-Cost Modules: Average price of €0.065/Wp, a 7.1% decrease from September and 27.8% from January 2024.
