

Patent for a liquid-cooled energy storage cabinet

Patent for a liquid-cooled energy storage cabinet

Frontiers , Research and design for a storage liquid refrigerator

Aiming at the pain points and storage application scenarios of industrial and commercial energy, this paper proposes liquid cooling solutions.

Liquid-cooled energy storage outdoor cabinet

The broken lines in the drawings depict portions of the liquid-cooled energy storage outdoor cabinet that form no part of the claimed design. The ornamental design for a liquid ...

Liquid cooling energy storage cabinet

In order to solve the technical problems, the technical scheme provided by the invention is as follows: the utility model provides a liquid cooling energy storage cabinet, includes the

CN223006830U

Through retrieval, the Chinese patent application No. CN202322139052.4 discloses a liquid-cooled energy storage outdoor cabinet based on voiceprint vibration detection, which is an

Battery String-S224

- 1C Charge/Discharge
- Easy configuration and maintenance
- Power supply can be single battery string or parallel battery strings

Research and design for a storage liquid refrigerator ...

Aiming at the pain points and storage application scenarios of industrial and commercial energy, this paper proposes liquid cooling solutions.

218005015 Liquid cooling integrated energy storage electric cabinet

The liquid cooling integrated energy storage electric cabinet is compact in structure, improves the energy density, and reduces the size of an energy storage system.

ENERGY STORAGE CABINET

In accordance with an embodiment of the present disclosure, an energy storage cabinet includes a frame, as well as a plurality of battery packs, a cooling device and a liquid tank disposed on ...

[WO/2025/130294 LIQUID-COOLED ENERGY STORAGE ...](#)

This patent search tool allows you not only to search the PCT database of about 2 million International Applications but also the worldwide patent collections. This search facility ...

[Energy storage liquid cooling unit patent](#)

The use of liquid air or nitrogen as an energy storage medium can be dated back to the nineteenth century, but the use of such storage method for peak-shaving of power grid was first proposed ...

CN118694013A

The invention realizes liquid-electricity isolation, improves the liquid leakage prevention effect, and can safely discharge or recycle the liquid leakage.
