

# Polish Krakow power storage company

## Overview

---

Does Poland need energy storage solutions?

Poland's shift toward renewable energy has accelerated significantly in recent years, creating an urgent need for energy storage solutions. According to the Energy Market Agency, Poland's installed solar capacity reached approximately 20.7 GW by the end of November 2024 – a 28% year-on-year increase.

Does Poland have a new energy storage subsidy programme?

The energy storage sector in Poland showed significant momentum even before the launch of this new subsidy programme. Through power market auctions for 2021-2028 and supplementary auctions for 2021-2025, contracts for energy storage with a total capacity of 9.5 GW were already wrapped up.

Does Poland need a large-scale battery storage system?

Poland's power system is evolving rapidly as it shifts from predominantly coal-based generation toward renewables, with solar PV and wind capacity projected to increase from approximately 31 GW today to 139 GW by 2050 according to Aurora research. As Poland's electricity markets evolve, there is a need for large-scale battery storage.
