

# Price of high quality solar panels

## Overview

---

Today's premium monocrystalline solar panels typically cost between 30 and 50 cents per Watt, putting the price of a single 400-watt solar panel between \$120 to \$200, depending on how you buy it. Less efficient polycrystalline panels are typically cheaper at \$0.25 per Watt.

Today's premium monocrystalline solar panels typically cost between 30 and 50 cents per Watt, putting the price of a single 400-watt solar panel between \$120 to \$200, depending on how you buy it. Less efficient polycrystalline panels are typically cheaper at \$0.25 per Watt.

For homeowners in New York, the average cost for a professionally installed residential rooftop solar system typically ranges from \$19,000 to \$35,000 before any tax credits or incentives are applied. This guide will provide a comprehensive breakdown of what that investment includes, the key factors.

Solar panel costs range from \$16,600 to \$20,500 for the average 6.5 kW system, but prices can vary from as little as \$7,700 for smaller solar systems to upward of \$34,700 for larger systems. To find the most up-to-date solar panel costs in 2025, we compared research from the U.S. Department of

As of 2026, the average cost of solar panels in New York is \$3.30 per watt, making a typical 6.9 kilowatt (kW) solar system \$16,632 after claiming the 30% federal solar tax credit now available. This is higher than the average price of residential solar power systems across the United States, which.

Solar panels generate "free" electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in 2025. That price effectively drops to \$19,873 after considering the full federal solar tax credit.

With utility rates rising at a rapid pace, going solar is a way to take control of your electricity costs and hedge against energy inflation. So, what's standing in the way of American homeowners and solar panels?

The biggest hurdle is often the perceived "upfront cost" of installing solar panels.

Installing solar panels on your home typically ranges from \$15,000 to \$25,000, depending on system size, location, and equipment. The average cost of a residential solar project falls around \$18,000, though this can rise if you add features like energy storage systems or premium panel types. Homes.
