TLS intelligent containerised waste water treatment system or sewage treatment plant (STP) is a modular system where all waste water treatment equipment is completely preinstalled in ISO standard or offshore standard containers. The modular containerised system with the various components of a.

KLARO Container is a flexible and mobile wastewater treatment system that can be used where a wastewater treatment system is required but there is no connection to the sewer system. KLARO containerized wastewater treatment systems score with their quality made in Germany, flexibility and.

Atlas Copco has developed a 10 ft and 20 ft container as an Energy Storage System, designed to meet the requirements of both off and on grid applications. Ideal for use in renewable power plants. Powered by lithium-ion batteries, this portable product is ready to supply reliable power in.

Because mobile energy storage isn't just about batteries on wheels - it's about keeping concerts lit, construction sites humming, and emergency services running

when the grid says “nope.” Film & Events: Ever seen a food truck at a festival?

Imagine that, but for quiet, clean power. Construction:.

We offer a range of self-contained mobile systems for rent to handle planned maintenance, unique treatment needs, challenging locations, or emergencies. Our solutions incorporate reliable, proven technologies that meet or exceed your requirements. With thoughtful design and elegant engineering. What is an intelligent containerised waste water treatment plant?

Intelligent containerised waste water treatment plants are ready to use immediately on delivery. A containerised portable waste water treatment plant gives clients the option to relocate it onsite or easily transport it to new sites as necessary.

What is a containerised portable waste water treatment plant?

A containerised portable waste water treatment plant gives clients the option to relocate it onsite or easily transport it to new sites as necessary. In addition to that, the systems are modular so that they can work together in a variety of combinations effectively dealing with variable waste water volumes to achieve any effluent quality.

How much energy does a containerized wastewater treatment plant use?

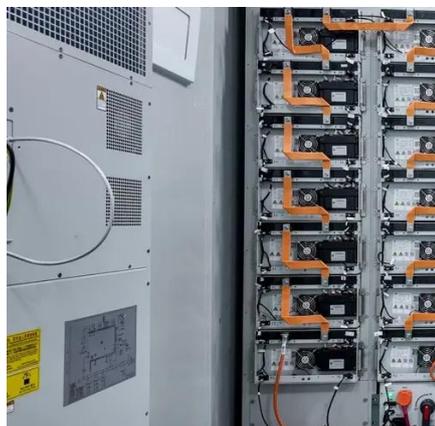

No planning or buildings are required to operate a containerized wastewater treatment plant - the plant simply needs to be placed on a solid base. This saves costs in advance, and the system is also highly efficient during operation: a 20-foot container only needs 13 kWh/d. Container.One, Container.One+, Container.Pro and Container.Xtra.

How do mobile sewage treatment plant containers work?

All our mobile sewage treatment plant containers operate in both underload and overload conditions Fully automatic operation and simple maintenance by unskilled staff The modular system allows for rapid expansion and addition of further treatment processes The systems are fully transportable and can easily be relocated and reinstalled at new sites
