

# RV Solar Charging System Installation

## Overview

---

How to choose a solar panel for RV battery charging?

**Inverter:** An inverter allows AC appliances to be used with DC battery power.

**Transfer Switch:** A transfer switch changes the power supply from one source to another. There are two main types to consider when choosing a solar panel for RV battery charging. A roof-mounted panel is permanently affixed to your roof with fasteners or adhesive.

How do I install solar panels on my RV?

The following should be used as a general guide only. The first step in installing a solar kit is mounting your RV panels. The process will differ depending on what type of panels you have. Rigid panels typically must be affixed to the roof with screws. Flexible panels can be mounted with screws but can also generally be mounted with adhesive.

How do I install a solar charge controller in my RV?

**Install the charge controller inside your RV:** Put the controller near your battery bank. **Connect the wires:** Attach the solar panel wires to the charge controller's "solar" input. Connect the controller to your battery bank, making sure to match the positive (+) and negative (-) terminals. **Safety first:** Use fuses or breakers to protect your wires.

How do I Charge my RV batteries?

You can hook up your RV batteries to a Portable Solar Panel kit to charge. Portable solar panel kits are commonly sized in the 50-200 watt range. These kits can meet basic electrical needs. These are all-in-one solutions that do not require any special installation or knowledge. 3. Large RV Solar Systems
