How do you change a circuit breaker?

To change a circuit breaker, find the main circuit breaker box and locate the defective breaker by looking for a tripped breaker. Next, turn off the branch breaker boxes, the main power, and the individual breakers. Remove the screws holding the circuit panel's face plate, then loosen the screws holding the wires on the defective breaker.

How do you fix a faulty circuit breaker?

If all is clear, carefully remove the faulty circuit breaker by unhooking it from the panel's hinge and pulling it out. Use a flathead screwdriver with a rubber handle to loosen the wire connecting the old circuit breaker to the panel. Safely tuck the exposed wire into the breaker box to avoid safety hazards.
