

Retail of single-phase folding containers for base stations

Overview

These compact units are ideal for frozen food storage, pharmaceutical cold chain management, seafood storage, and other industries requiring reliable subfreezing temperatures. Each container shell is fully inspected and refurbished to meet cargo-worthy standards.

These compact units are ideal for frozen food storage, pharmaceutical cold chain management, seafood storage, and other industries requiring reliable subfreezing temperatures. Each container shell is fully inspected and refurbished to meet cargo-worthy standards.

We redefine possibilities by providing a diverse range of shipping and storage solutions, offering modified containers and trailers crafted with precision, quality, and a commitment to meeting the unique needs of our valued customers. © 2025 Midstate Containers. Our 20ft Refurbished Single-Phase Low Temperature Refrigerated Storage Containers combine a refurbished ISO-grade steel shipping container shell with a brand-new commercial refrigeration system designed for low-temperature applications. These compact units are ideal for frozen food storage.

Whether you're storing frozen seafood in Maine, fresh produce in Florida, or holiday turkeys at a retail store in California, our refrigerated containers (also known as reefer containers) provide an efficient, mobile, and cost-effective solution to maintain product integrity across the cold chain.

As the latest addition to Tradecorp's ever-expanding product list, the 20' RF Single Phase Container is now available for rent or sale to customers who need a robust reefer container solution. Despite its single-phase electricity system, the container allows users to enjoy the full benefits.

Our 10ft single phase units do not require the industrial 3 phase power of our other units. Customers who do not have 3 phase power, have noise restrictions or have long term chill applications will find these units an ideal solution. No spam. No flooding your inbox with stuff you don't need.

The 20' Refrigerated Single Phase Container is engineered for businesses requiring

reliable, compact cold storage powered by a conventional single-phase connection. Designed for static operations, it offers a seamless solution for industries where mobility is less critical but temperature integrity.
