atistical purposes. Without a subpoena, voluntary compli n the city of Riga. Riga's current Sustainable Energy Action Plan is the Riga Smart City SEAP 2014-2020, a follow-up to the first document, the Riga City SEAP 2010-20 0 launched in 2010. In the first version of the action plan, the city of.

Hanersun has announced the commissioning of a 1.15MWh commercial energy storage project in the Latvian capital Riga. The project, featuring five units of the company's HNESS 230-L liquid-cooled cabinets, highlights its increasing role in advancing Europe's renewable energy transition. Latvia.

Therefore, in the generation portfolio of Latvenergo, alongside hydro power plants (installed capacity ~1550 MW), combined heat and power plants (~1050 MW) and solar and wind capacities under development, we planned to build a BESS which will ensure synergy with the generation and sales portfolio.

As part of its strategic commitment to maintaining a leading position in renewable energy across the Baltic states, Latvenergo Group plans to install 250 MW of battery storage with a capacity of 500 MWh by 2030. Latvenergo, a state-owned energy company based in Latvia, plans are to expand its.

Riga's aging power infrastructure currently operates at 92% peak capacity during winter months, with renewable integration rates lagging behind EU averages by 18% [3]. The problem's crystal clear: we're trying to power a 21st-century smart city with mid-20th-century grid technology. Wait, no—it's.

On November 1 Latvia's largest wind energy producer Utilitas Wind opened the

first utility-scale battery energy storage battery system in Latvia with a total power of 10 MW and capacity of 20 MWh in Targale, Ventspils region. This autumn, the Battery Energy Storage System (BESS) will be connected.
