

Romanian power storage

Overview

Where is the largest battery energy storage system in Romania?

Nova Power & Gas, part of the E-INFRA Group, has announced the commissioning and start of commercial operations of the largest battery energy storage system (BESS) in Romania. The facility, located in Florești, Cluj County, has an installed power of 200 MW and a storage capacity of 400 MWh.

Is battery energy storage a pillar of Romania's energy transition?

Recent updates about investments in battery energy storage systems (BESS) in Romania indicate the technology is becoming another pillar of the country's energy transition alongside wind power. For several years now, photovoltaics, and prosumers in particular – including municipal authorities, have dominated the scene.

How long will a battery energy storage system last in Romania?

It is about to start building the BESS in Scornicești in Olt county, west of Bucharest. R.Power is planning to complete it in a year. The battery energy storage system would have a duration of two hours, translating to 254 MWh in capacity. The project received funding from the National Recovery and Resilience Plan (NRRP or, in Romanian, PNRR).

What is R power doing in Romania?

In addition to its activities in Romania, R.Power is involved in several renewable energy and storage initiatives across Europe. In related news, IPP Renalfa has acquired a 258 MW solar project in Teleorman, Romania, which is expected to begin operations in 2027.
