

# SUNSHINE 540W PV Panel Size

## Overview

---

To give you an idea, a standard 540 watt solar panel is approximately 88 x 46 inches and tips the scales at around 72 pounds. Most modules with this output rating are monocrystalline and typically have at least 72 cells (144 half-cut cells).

To give you an idea, a standard 540 watt solar panel is approximately 88 x 46 inches and tips the scales at around 72 pounds. Most modules with this output rating are monocrystalline and typically have at least 72 cells (144 half-cut cells).

The Sunshine 540 W Solar Panel is a high-output, efficient module designed for residential, commercial, and utility-scale solar applications. Built with advanced half-cell and PERC technology, it delivers excellent performance, durability, and reliability even under low-light or harsh environmental.

By using half-cells, the electrical current (  $i$  ) flowing in each busbar is halved. Therefore, the amount of internal losses in a half-cut module is 1/4 of a full sized cell module. Shading loss of half-cell is much better than normal module in certain shading conditions. Good durability can resist.

Assembled with multi-busbar PERC cells, the half-cell configuration of the modules offers the advantages of higher power output, better temperature-dependent performance, reduced shading effect on the energy generation, lower risk of hot spot, as well as enhanced tolerance for mechanical loading.

Bluebird Solar manufactures cutting-edge technology-based 540 Watt Solar Panels, delivering exceptional performance and efficiency. These solar modules are equipped with a state-of-the-art 144-cell configuration, 10BB technology, and Mono PERC cells, ensuring maximum sunlight absorption and.

Now let's compare it to a 6 kW system built with 540 W solar panels. A PV module

from ZNShine needs about 28 ft<sup>2</sup> of space, and you need only 11 of them to build a 6 kW system. The math: 28 ft<sup>2</sup> × 11 modules = 308 ft<sup>2</sup>. You save 50 ft<sup>2</sup>, enough to install two more 540 W modules. Installing 540 W solar.
