

San Salvador s new solar panels

Overview

The Bósforo solar project, a key initiative from AES El Salvador, is already operating at full capacity with 10 solar plants strategically located across the country. It will soon be joined by the Capella Solar project, scheduled for completion in 2025.

The Bósforo solar project, a key initiative from AES El Salvador, is already operating at full capacity with 10 solar plants strategically located across the country. It will soon be joined by the Capella Solar project, scheduled for completion in 2025.

POWERCHINA has secured the contract to construct the 30MW La Trinidad solar project in El Salvador. This development is a key part of the broader 70MW San Miguel solar initiative. The project will use over 62,000 Longi solar modules and is projected to generate 188,000 MWh of energy annually.

POWERCHINA has secured a pivotal contract for the Conchagua 30MW Solar EPC Project in El Salvador, marking the start of contract management activities. The project is situated in the La Unión Bay area, approximately 145 kilometers southeast of San Salvador, El Salvador's capital. It encompasses the.

As countries around the world shift towards renewable energy sources, El Salvador is gradually increasing its solar and wind energy capacity. While the progress is commendable, particularly in solar, there is still ample room for further development and investment in the country. The growth.

El Salvador is making significant strides to expand its renewable energy capacity, with new solar and wind projects slated to come online by 2025. At the forefront of this effort is AES El Salvador, which is overseeing the full operation of its Bósforo solar project and the upcoming Capella Solar.
