RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank, panel mounting, fully framed windows, insulation, door, exterior + interior paint, flooring, overhead lighting, mini-split + more customizations! RPS can customize the Barebones and Move-In Ready options to any design.

Start the new year by investing in energy freedom that pays off all year long. Going solar in 2026 means lower utility bills, greater energy independence, and reliable power you can count on—no matter what the year brings. Whether you're building an off-grid system, strengthening your home backup.

AET's Hybrid Solar Container provides an integrated off-grid power solution designed specifically for challenging environments. This preconfigured system combines solar energy with hot water storage, ensuring a seamless and efficient energy source for military operations and disaster relief.

What is LZY's mobile solar container?

This is the product of combining collapsible solar panels with a reinforced shipping container to provide a mobile solar power system for off-grid or remote locations. Unlike standard solar panel containers, LZY's mobile unit features a retractable solar panel.

MOBIPOWER containers are purpose-built for projects where energy demands go beyond what a trailer can deliver. These rugged, self-contained systems integrate large solar arrays, advanced battery storage, and high-capacity fuel cells — with optional diesel redundancy when regulatory or client.

Upgrade your shipping container home or office with a solar power kit and make the transition to off the grid living effortless! This system is designed to easily connect all your essential appliances (air-conditioners, computers, lights,

microwaves and more). It's equipped with a 3000 watt power.
