

Solar energy storage cabinets

Solar energy companies are going to collapse

Overview

In 2025 alone, several major solar companies are going out of business, even as demand for clean energy rises. Homeowners increasingly face unsupported systems, voided warranties, and limited service options. So why are solar companies going out of business in what should.

In 2025 alone, several major solar companies are going out of business, even as demand for clean energy rises. Homeowners increasingly face unsupported systems, voided warranties, and limited service options. So why are solar companies going out of business in what should.

The solar energy industry is experiencing significant upheaval, with major companies facing financial turmoil. Recently, Sunnova Energy, one of the leading solar providers in the United States, filed for Chapter 11 bankruptcy protection on June 8, 2025. This move raises urgent questions about the.

The solar industry experienced exponential growth over the last decade as costs fell and favorable policies helped drive mass adoption. However, 2024 has brought immense challenges, with higher interest rates, tighter financing, and adverse policy shifts in key states contributing to over 100 solar.
