

# Solar panels at the Arequipa solar plant in Peru

## Overview

---

Peruvian company Cemento Yura (Gloria Group) has commenced operation of a 30MW peak photovoltaic plant covering 45ha and comprising 51,264 solar panels at its plant in Arequipa. It is the first company in Peru to open such a plant, completing a project which began in 2019.

Peru is making significant strides in its transition to renewable energy, with solar power emerging as a key pillar of its strategy. Highlighting this green transformation is the country's largest solar facility, the San Martín solar park, a monumental project setting a new benchmark for clean.

Zelestra, a Spanish renewable energy company, has officially switched on the country's largest solar farm. The solar farm, dubbed the San Martín project, consists of 450,000 solar panels and will generate over 830 GWh of clean energy annually, powering more than 400,000 homes. To put it in.

ACCIONA Energía has announced today the start of construction of a new 177.9 MWp photovoltaic project in the district of La Joya (Arequipa), with start of operations expected by the end of 2026. The solar plant will comprise 288,000 photovoltaic modules. It will generate 488GWh of clean electricity.

Peru's government and Spanish company Zelestra have officially launched the San Martín Solar Plant in Arequipa, making it the largest solar facility in the country. The plant delivers 300 megawatts of electricity, enough to power about 440,000 homes, using over 450,000 solar panels that cover more.

With a total installed capacity of nearly 300 MW, contracted by the power company

Kallpa, the San Martin solar photovoltaic plant will start operating in the second quarter of 2025 in the district of La Joya, Arequipa. Solarpack Corporación Tecnológica S.A.U. (“Solarpack”), a global renewable.
