

# Solar panels on rural roofs in Vanuatu

## Overview

---

This project is aligned to the Government of Vanuatu's National Energy Road Map for increasing the energy access for rural communities in Vanuatu. The installed solar PV system is a stand-alone 230/400 VAC 50Hz solar micro-grid combined with 48V batteries operating 24 hours and 7 days.

This project is aligned to the Government of Vanuatu's National Energy Road Map for increasing the energy access for rural communities in Vanuatu. The installed solar PV system is a stand-alone 230/400 VAC 50Hz solar micro-grid combined with 48V batteries operating 24 hours and 7 days.

On the remote island of Malekula, a new solar micro-grid is changing the lives of over 2,800 people -- boosting local development while contributing to Vanuatu's sector-specific target of transitioning to close to 100 percent renewable energy in the electricity sector by 2030. Launched in September.

As a Small Island Developing State in the south western Pacific, Vanuatu faces a series of challenges due to its small size, remoteness, and vulnerability to climate change impacts and economic shocks. These factors not only threaten the well-being of its population, around 300,000 people spread.

With exceptional solar energy potential in the South Pacific, Vanuatu offers numerous companies providing installation and maintenance services for both residential and commercial properties. Government incentives and programs further enhance the accessibility of solar energy adoption, although.

Independent Energy Ltd provides fully integrated solar, battery, and generator systems to power homes, businesses, and communities with reliable and cost-effective energy—on-grid or off-grid. Your Energy, Guaranteed. Reliable solar, battery, and generator systems—custom-built for homes, businesses.

This project is aligned to the Government of Vanuatu's National Energy Road Map for increasing the energy access for rural communities in Vanuatu. The installed solar PV system is a stand-alone 230/400 VAC 50Hz solar micro-grid combined with 48V batteries operating 24 hours and 7 days a week. Is.

Cetelnet is proud to lead this transition by delivering tailored renewable energy

solutions in Vanuatu —from solar and hybrid systems to off-grid mini-grids for remote communities. We design, install, and maintain reliable, scalable systems that reduce reliance on fossil fuels and improve energy.

## Solar panels on rural roofs in Vanuatu

### Vanuatu launches country's first-ever community-run solar station ...

This project is aligned to the Government of Vanuatu's National Energy Road Map for increasing the energy access for rural communities in Vanuatu. The installed solar PV system is a stand ...
