Based on interconnection data, this map represents the most comprehensive summary available of installed solar capacity and annual trends, including projects that did not receive State funding, for all of New York since 2000. In addition, you can access large-scale solar projects that participate.

New York continues to be a national leader in the clean energy transition with the most aggressive climate change program in the nation putting the State on the path to be entirely carbon-neutral across all sectors of the economy. New York State's Climate Leadership and Community Protection Act.

New York State is making solar energy more accessible to homes, businesses, and communities through NY-Sun incentives and a network of qualified installers. Combined with declining equipment costs, New York State tax credits, and Inflation Reduction Act tax credits for commercial solar, going solar.

Generate your own clean energy from the sun for free with solar. Add Powerwall to store your energy for use anytime you need it. Flexible financing and low monthly lease options can help you secure the best price for your solar system. By installing solar panels, you can also reduce your reliance.
