

Solar panels trading

Overview

As solar panels become more common on homes and businesses, P2P trading offers a revolutionary way to share excess energy, reduce reliance on traditional utilities, and create a more resilient, community-driven energy system.

As solar panels become more common on homes and businesses, P2P trading offers a revolutionary way to share excess energy, reduce reliance on traditional utilities, and create a more resilient, community-driven energy system.

Are you ready to revolutionize the way you buy or sell solar equipment?

Sunhub brings you a cutting-edge platform that simplifies the entire process, from negotiation to sealing the deal. Say goodbye to non industry pricing structures. Sunhub lets you trade and negotiate in Price per Watts.

Imagine a world where you can buy and sell solar energy directly with your neighbors, just like you would trade goods at a local market. Thanks to Peer-to-Peer (P2P) Solar Energy Trading, this vision is becoming a reality. Imagine a world where you can buy and sell solar energy directly with your.

The US solar industry installed 11.7 gigawatts direct current (GWdc) of capacity in Q3 2025, a 20% increase from Q3 2024, a 49% increase from Q2 2025, and the third largest quarter for deployment in the industry's history. Following a low second quarter, the industry is ramping up as the end of.
