

# Solar power generation and energy storage wholesale in Russia

## Overview

---

How much does a solar power plant cost in Russia?

According to Russian suppliers for solar power plants (altecology.ru, 2019; Solar controller, 2020), the average cost of equipment for solar power plants with an installed capacity of 10 MW is 310 million rubles.

Why are Russia's solar panels so unreliable?

These events suggest a fragile and unreliable power supply in these areas, heavily influenced by both technical issues and ongoing military conflict. Explore Russia solar panel manufacturing landscape through detailed market analysis, production statistics, and industry insights.

How many solar power plants are there in Russia?

Insolation map of Russia (Map of Insolation of Russia, 2019). At the beginning of 2020, thirteen solar power plants with a total installed capacity of more than 300 MW are already operating in this region (Solar Power Plants in the Orenburg Region, 2019).

Can solar power plants pay back without government support?

Our findings demonstrate that the payback of solar power plants in Russia without government support at the current energy prices can be achieved when they operate at the retail electricity markets. In this case, the payback period does not exceed 15 years.
