

Solar tile direct sales

Overview

What is a solar tile manufacturer?

As a solar tile manufacturer, we offer innovative solutions to meet your solar product needs. Our solar tiles integrate advanced solar cell technology and can be a direct replacement for traditional tiles as part of a building's roof, providing clean, renewable energy for your home.

What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.

Are solar roof tiles a good choice?

Glass solar tiles produce energy, while architectural-grade steel tiles add longevity and corrosion resistance to your roof. Both are durable, strong and engineered for all-weather protection. With a 25-year warranty, Solar Roof will continue to produce clean energy and protect your home for decades to come.

Are solar tiles a good investment?

Solar tiles have a variety of benefits and drawbacks to take into account in conclusion. On the plus side, solar tiles are attractive, adaptable, and can raise the value of your home. In addition, they are strong, offer clean energy, and can be installed on many roofs.
