

Solomon Islands Solar Lighting System

Overview

Thanks to the generous support of the people and Government of Japan, in partnership with the Ministry of Health and Medical Services (MHMS) and the World Health Organization (WHO), a remote health facility previously without electricity is now powered by the sun.

Thanks to the generous support of the people and Government of Japan, in partnership with the Ministry of Health and Medical Services (MHMS) and the World Health Organization (WHO), a remote health facility previously without electricity is now powered by the sun.

The Takataka Eco-Village Conservation Foundation (TEVCF) has successfully handed over a state-of-the-art solar-powered hub and street lights to the community in East Are'are, Malaita province, in the Solomon Islands. This pivotal project is set to significantly bolster local economic growth.

The solarization project has been implemented in health clinics located in Marara and Grove health zones. In the quiet hills of rural Solomon Islands, where electricity was once a luxury, and health workers relied on torchlight and kerosene lamps to treat patients at night, a remarkable.

UN Women's Markets for Change (M4C) project is a six-year, multi-country initiative that aims to ensure marketplaces in rural and urban areas of Fiji, Solomon Islands and Vanuatu are safe, inclusive and non-discriminatory, promoting gender equality and women's empowerment. A UN Women project, M4C.

The small island nation of the Solomon Islands is located in the Pacific Ocean and has a population of around 600,000 people. The majority of the population lives in rural areas where there is little access to reliable electricity. One village, in particular, is located on the outskirts of the.

Solomon Power also supports the installation of small scale grid connected micro embedded generators that convert renewable energy into electricity that can be used in your home or business premises. Sources of renewable energy can include solar photovoltaic cells (PV) or micro-turbine systems.

mestic solar power system Why Go Solar?

Solar energy can help save you money on your electricity bill by replacing some of your consumption from the Solomon power grid. Solar power systems have no moving parts re system powered by 24/7 solar energy. This came after the hospital's new solar-battery.
