

# Stockholm Energy Storage Product Manufacturing Plant

## Overview

---

Located in the Energy Port in Värtaverket, Sweden the project, known as Beccs Stockholm, will be Sweden's first large-scale bioenergy plant with carbon capture and storage (CCS). Construction 'will begin immediately' with startup scheduled for 2028.

Located in the Energy Port in Värtaverket, Sweden the project, known as Beccs Stockholm, will be Sweden's first large-scale bioenergy plant with carbon capture and storage (CCS). Construction 'will begin immediately' with startup scheduled for 2028.

Leading global lithium-sulfur battery manufacturer Lyten announced it has secured more than \$200 million in additional equity investment to support its recent acquisitions and overall expansion plans. Lyten additionally announced the acquisition of Northvolt's Battery Energy Storage System (BESS).

Stockholm Exergi has announced that it is to build one of the world's largest facilities for capture and permanent storage of biogenic carbon dioxide. The investment decision marks a major milestone in enabling permanent removal and will help Sweden and the EU reach their long-term climate goals.

Stockholm Exergi, Stockholm's energy provider, is building a large-scale facility for CO<sub>2</sub> capture and permanent storage (Bio-Energy with Carbon Capture and Storage - Bio-CCS or BECCS) at the existing biomass combined heat and power plant in Stockholm. The Bio-CCS plant is designed to capture.

Swedish energy company Stockholm Exergi is to build what it said will be one of the world's largest facilities for carbon capture and permanent storage. Located in the Energy Port in Värtaverket, Sweden the project, known as Beccs Stockholm, will be Sweden's first large-scale bioenergy plant with.

When Kiruna's iron mines needed to cut diesel consumption by 60%, Stockholm's Nordic Tank Innovators delivered tanks using vacuum-insulated walls and self-healing polymer coatings. The result?

A system that keeps 5 million liters of alternative fuels operational at -40°C—proving that Swedish.
