

Syrian Energy Storage Power Station Foreign Trade Export Company

Overview

What if Syria doesn't have reliable energy supplies?

The lack of reliable energy supplies is a major concern for Syrian citizens and its new government, making it a key point of leverage. Qatar and Türkiye have stepped in to provide short-term assistance. The two states have provided two floating power stations, while Türkiye is also connecting its grid to Syria.

What is the outlook for Syria's Energy Resources & Infrastructure?

A quick outlook regarding Syria's energy resources and infrastructure, including the role of declining oil revenue under the Assad regime's governance and the prospects for, and geopolitical impact of, Syrian energy production and trade in a new era.

What type of energy is used in Syria?

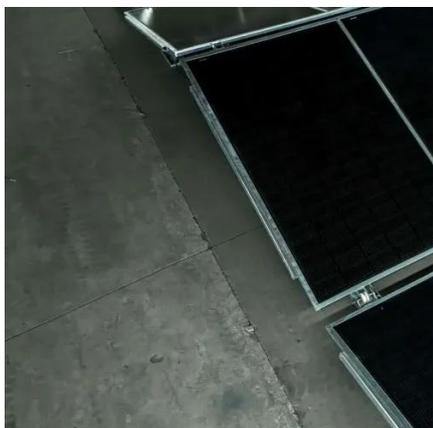

Energy in Syria is mostly based on oil and gas. Some energy infrastructure was damaged by the Syrian civil war. There is high reliance on fossil fuels for energy in Syria, and electricity demand is projected to increase by 2030, especially for industry activity such as automation.

How will Syria's energy projects impact the economy?

Upon completion, the projects are expected to supply over 50% of Syria's national electricity needs, representing a transformative leap toward energy security, economic revival, and infrastructure resilience. This initiative goes beyond grid stability, aiming to deliver widespread social and economic impact through:
