The station located in Lost Hills, California, features 11 MW of solar panels and 39 MWh of battery energy storage systems. On November 25, 2025, Tesla officially fully opened its largest Supercharging site in the world, equipped with 164 stalls. The station is located in Lost Hills, California.

Project Oasis, the world's largest Supercharger site, is now partially open to customers for its first phase in Lost Hills, California. What makes this remarkable is the speed of execution. In just eight months, Tesla has constructed a site that will eventually feature 168 stalls (84 stalls are now).

In a significant advancement for the electric vehicle (EV) infrastructure, Tesla has unveiled the world's largest Supercharger station, boasting an impressive 168 stalls. Located in Santa Monica, California, this facility is not only a marvel of engineering but also a leap towards sustainable.

Tesla partially opened what will become the world's biggest Supercharger station later this year. The first phase includes 84 charging stalls powered entirely by the sun and operated off-grid. By the end of the year, the station will have 168 stalls on a 1.5-MW grid service, the rest being powered.

The world's largest Tesla Supercharger is now fully operational in Lost Hills, California, delivering 164 charging stalls powered almost entirely by the sun. Tesla confirmed the completion of its "Oasis" Supercharger station via X, marking a major infrastructure milestone just in time for.

Tesla has broken ground on an ambitious new Supercharger project called 'Oasis' that promises to revolutionize electric vehicle (EV) charging infrastructure in the United States (U.S.). In detail, the Supercharger station is located in Lost Hills,

California, along the bustling Interstate 5.
