

The latest news on wind and solar complementary procurement for foreign solar container communication stations

Overview

In July 2025, a wave of new federal actions altered the review and approval process for wind and solar projects across the U.S., which have introduced likely delays, uncertainty, and risk. ECT's experts have analyzed these developments and outlined key takeaways to help you stay.

In July 2025, a wave of new federal actions altered the review and approval process for wind and solar projects across the U.S., which have introduced likely delays, uncertainty, and risk. ECT's experts have analyzed these developments and outlined key takeaways to help you stay.

Christian Roselund, Intertek CEA's Senior Policy Analyst, joins the SunCast Media Podcast to decode how FEOC is reshaping the way projects are sourced, engineered, financed, and papered across the U.S. solar and storage market. That's the billion-dollar question developers across the U.S. are.

With the budget bill passed and new Section 232 polysilicon and AD/CVD cases making headlines, solar and energy storage developers and equipment buyers are facing an increasingly complex landscape. Recommendations and timelines are constantly changing as new policy updates and challenges (such as.

In July 2025, a wave of new federal actions altered the review and approval process for wind and solar projects across the U.S., which have introduced likely delays, uncertainty, and risk. ECT's experts have analyzed these developments and outlined key takeaways to help you stay on track. Facing.

President Donald Trump on 7 July signed an executive order directing federal agencies to end subsidies and tax credits for renewable energy projects—principally wind and solar—that depend on supply chains controlled by foreign entities. Under the order, the Treasury Department must, within 45 days.

By disqualifying projects or companies that do not meet the new criteria, the rules in the House Ways and Means Committee's proposed budget potentially could sideline clean energy initiatives already in development from receiving credits. Congressional proposal to strengthen and speed tax-credit.

The U.S. Department of the Interior (DOI) issued a memorandum on July 15, 2025,

announcing the end of what DOI refers to as "preferential treatment" for "unreliable, subsidy-dependent" 1 wind and solar energy projects involving federal lands, approval, or funding. Under the new directive, all. How have new federal actions impacted wind & solar projects?

In July 2025, a wave of new federal actions altered the review and approval process for wind and solar projects across the U.S., which have introduced likely delays, uncertainty, and risk. ECT's experts have analyzed these developments and outlined key takeaways to help you stay on track. Facing delays or need guidance navigating these shifts?

How does the new DOI policy affect wind and solar development?

For companies involved in the development of wind and solar requiring federal permitting, consultation with federal agencies, federal funding, or federal lands, the new DOI policy significantly increases the complexity and potential duration of the federal approval process.

Is USFWS still available to process solar and wind energy projects?

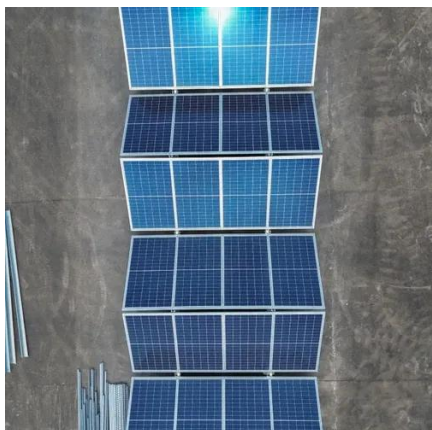

In light of this uncertainty, USFWS moved to update their Information for the Planning and Consultation (IPaC) portal on July 18, 2025, to state that the resource is no longer available to process solar and wind energy projects.

What are the new wind & solar energy regulations?

Under the new directive, all agency-related decisions and actions related to wind and solar energy facilities - ranging from site lease approvals to environmental assessments and impact statements - must now undergo an elevated review by the Office of Secretary Doug Burgum.
