Overview

What is a Tigo go inverter?

The Tigo GO Inverter is the centerpiece of the Tigo GO ESS solution. It orchestrates energy production and consumption (when coupled with the Tigo GO Battery). In addition, it enables module-level monitoring, optimization, and rapid shutdown when paired with Tigo TS4 MLPE (Module Level Power Electronics) through the EI platform.

What is a three-phase inverter?

A three-phase inverter is an electronic device used to convert direct current (DC) into three-phase alternating current (AC). This type of inverter is commonly used in industrial and commercial applications where three-phase power is needed, such as in electric motors, pumps, fans, and other heavy machinery.

What is a 90 kW 3 phase inverter?

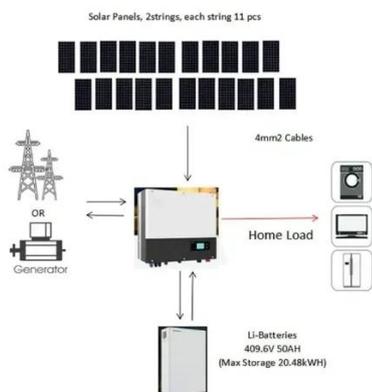

90 kW 3 phase inverter 230V, 400V, 460V, IP 20 enclosure rating, V/F control mode, 5%-95%, without condensation. The 3 phase variable frequency inverter with input frequency 50Hz / 60Hz has good performance, such as overcurrent protection, overvoltage protection, and undervoltage protection.

What is VFD inverter 3 phase?

Equipped with IP20 enclosure protection, the vfd inverter 3 phase has strong impact resistance and high safety performance. With RS485 communication, the PID controller of frequency drive inverter is convenient to make closed-loop system. Easy to install and use.
