

# Uninterruptible Power Supply BESS Reykjavik

## Overview

---

An uninterruptible power supply (UPS) or uninterruptible power source is an electrical apparatus that provides emergency power to a when the input power source or fails. A UPS differs from an auxiliary or or in that it will provide near-instantaneous protection from input power interruptions, by supplying energy stored in batteri.

In areas with increasing populations and ever-growing demand loads, BESS can be installed without additional transmission lines.

### [What is a battery energy storage system \(BESS\)?](#)

With wind or solar battery storage, BESS can supply power during low-generation periods. Integrating with a grid-interactive UPS, BESS enables peak shaving. This strategy ...
