

Usp output 380 volt uninterruptible power supply

Overview

Line-interactive UPSs with rechargeable batteries that maintain uninterrupted power to critical loads via multiple output sockets during mains failures; they also protect from mains undervoltage and overvoltage. Local displays and PC-based monitoring software provided. Rack-mounting.

Uninterruptible power supplies (UPS) are essential to ensure you have continuous power during a power outage. From a small UPS to save and shut down your PC, to large commercial systems that power large data centers or critical systems in hospitals, we have the solutions you and your customers.

Uninterruptible Power Supply (UPS) systems provide power to computer networks in the event of a power shortage or electrical outage so computers and other sensitive electronic equipment can be turned off properly. UPS system batteries keep systems running and help prevent data loss in the event of.

A UPS supplies power even in the event of mains failure and protects your system against supply interruptions. We offer UPS solutions for DC and AC applications where the functionality and design are optimally tailored to the requirements of various different industries. Supply your system reliably.

The Eaton 9355 UPS (formerly the Powerware 9355) is a three-phase, double-conversion online UPS that provides a complete power protection solution. In a footprint that is up to 75 percent smaller than comparable UPSs, the 9355 UPS comes complete with internal batteries, an integrated power.

Compact AC and DC-input DIN-rail units providing adjustable 24VDC outputs and status signals. Line-interactive UPSs with rechargeable batteries that maintain uninterrupted power to critical loads via multiple output sockets during mains failures; they also protect from mains undervoltage and.

Due to continuous product improvements, program specifications are subject to

change without notice. Note: Backup times are approximate and may vary with equipment, configuration, battery age, temperature etc. 1. 50/60 Hz auto-sensing.
2. An input neutral is required for all configurations unless.
