ROME (AP) — Italy agreed Thursday to a Vatican plan to turn a 430-hectare (1,000-acre) field north of Rome, once the source of controversy between the two, into a vast solar farm that the Holy See hopes will generate enough electricity to meet its needs and turn Vatican City into the world's first.

Pope Francis has announced measures to transition Vatican City to using solar energy as its main source of electricity, as outlined in his latest motu proprio titled *Fratello Sole*, or "Brother Sun." The Holy Father has tasked the relevant Vatican governing bodies to collaborate with Italian.

On July 31, at the historic Palazzo Borromeo, the Holy See and the Italian Republic signed a landmark agreement to build an agrivoltaic system in Santa Maria di Galeria. Photo: Vatican Media According to the Vatican's press office, the installation will apply the most advanced solutions currently.

The installation of solar panels on Vatican-owned land to the north of the capital follows the photovoltaic glazing of the Cortile delle Corazze and the Vignaccia warehouse of the Vatican Museums (350 kilowatts peak for a total production of 500 megawatt hours) and the 5,000 square metre roof of.

Italy and the Holy See agreed to develop the 430-hectare Santa Maria Galeria site north of Rome into a solar farm designed to meet the Vatican's full electricity needs, with any excess power provided to the local community. The project preserves agricultural use and minimizes environmental impact;
