

# Victoria Battery Energy Storage Station Planning

## Overview

---

Located around 23 km east of Stawell in the Wimmera region of Victoria, Australia, the project is expected to begin construction in the second quarter of 2025, ahead of energisation in 2027. It will cover 10 hectares of land.

Located around 23 km east of Stawell in the Wimmera region of Victoria, Australia, the project is expected to begin construction in the second quarter of 2025, ahead of energisation in 2027. It will cover 10 hectares of land.

Today (29 August), the Victoria government announced it has streamlined the planning process to deliver the state's "largest" battery energy storage system (BESS), ACEnergy's 350MW/700MWh Joel Joel project. The project has become the first to be fast-tracked by Victoria's minister for planning.

Victoria is the home of big batteries and has legislated storage targets of at least 2.6 GW by 2030 and 6.3 GW by 2035 to provide crucial support for more renewable capacity. Storage is a vital part of our electricity grid. In the future, much of our energy will be generated closer to where it is.

The first battery energy storage project has been approved under the Victorian government's streamlined renewable energy planning process, with the state signing off on a 350 MW / 700 MWh project being developed by ACEnergy in the Wimmera region. The Victorian government announced the \$250 million.

The Victoria government in Australia has approved a 300MW/1,200MWh battery energy storage system (BESS) in Gippsland and a 332MW solar PV power plant with integrated storage in the state's northeast region, via the Development Facilitation Program. Victoria's planning minister, Sonya Kilkeny.

Use and development of the land for a utility installation (battery energy storage system and powerline) and the removal of 0.059 hectares (ha) of native vegetation. Why is the Minister responsible?

Why is the Minister responsible?

permit or the scheme to be endorsed, approved or done to the.

Australia's Victoria government has expedited plans for a 400MWh battery energy storage system (BESS) and a 500MW solar-plus-storage project through its Development Facilitation Program (DFP). The developer, Mint Renewables, is set to construct the 200MW/400MWh Dederang BESS in northeastern.
