Overview

How does a villagrid Solar System work?

Your PV (Photovoltaic solar system) collects energy from the sun and stores it in your VillaGrid Storage System. Your system connects to a Inverter which converts the DC energy stored in your VillaGrid battery storage system and converts it to usable AC energy that your home appliances can use.

How does a villagrid battery storage system work?

Your system connects to a Inverter which converts the DC energy stored in your VillaGrid battery storage system and converts it to usable AC energy that your home appliances can use. The VillaGrid allows you to avoid peak hour charges, reduces your dependence on the energy grid and keeps you running in the event of an outage.

Where is Villara energy systems located?

Villara Energy Systems, located near Sacramento, California, is part of the Villara family of companies (established in 1947), which has been installing home energy equipment (including solar, batteries, and generators) for about 20 years. In 2021, it launched the VillaGrid, the only 20-year home battery currently available on the market.

Why do I need a solar energy storage system?

The VillaGrid allows you to take control of your home energy management and electric usage rather than being relying solely on the grid. Including a Solar Energy Storage System in your home you are assisting us in helping to safe guard our planet.
