

# Where are the 5g base stations of Finnish Communications

## Overview

---

Who dominates the 5G market in Finland?

The 5G market in Finland is dominated by three key players, Elisa, Telia, and DNA. The coverage of 5G in the country is challenged by a vast contrast between urban and rural areas.

Is Finland covered by a 5G network?

Half of Finland's population is soon to be covered by a 5G network. While 5G networks are constructed and consumers adopt 5G phones in increasing numbers, the application of the new technology in industry and business is making progress.

What was the purpose of 5G Finland?

5G Finland was set up to create and pilot applications and services enabled by 5G. The network of 100 companies and 300 people was active during 2017-2020.

What is 5G mobile broadband?

The fifth generation of mobile broadband, or 5G, is the most advanced mobile broadband technology developed in response to the increasing demands for faster and broader bandwidth. It is currently being deployed in several markets around the world, including in the United States and many countries in Europe.
