This profile provides a snapshot of the energy landscape of Grenada—a small island nation consisting of the island of Grenada and six smaller islands in the southeastern Caribbean Sea—three of which are inhabited: Grenada, Carriacou, and Petite Martinique. The 2015 electricity rates in Grenada are.

The Public Utilities Regulatory Commission (PURC) and the Rocky Mountain Institute (RMI) have entered a landmark partnership aiding the advancement of Grenada’s sustainable energy goals. Supported by the Government of Grenada and the Grenada Electricity Services Ltd. (Grenlec), this transformative.

This is the Energy Report Card (ERC) for 2023 for Grenada. The ERC also includes sectoral data and information on policies and regulations; workforce; training and capacity building; and related areas. The data and information that are available in the ERC were mostly provided by the government.

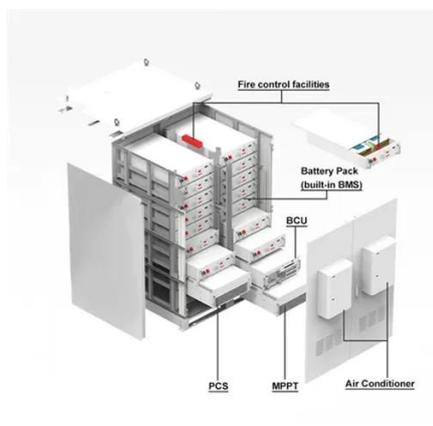

Grenlec executes EC\$6.4million agreement to increase solar electricity generation—it’s the largest renewable energy investment in Grenada to date. Grenlec recently finalized a contract for 13 solar photovoltaic (PV) renewable energy installations, totaling 937 kW of capacity at an aggregate capital.

Grenada is seeking an independent power producer (IPP) to build and operate a 15.1 MW utility-scale PV project for 25 years. The plant, planned near Maurice Bishop International Airport, will supply about 40% of the island’s peak load. Grenada has launched a tender for a 15.1 MW PV project in a bid.

International Airport (MBIA), Point Salines, Grenada.
