

Which company owns the London energy storage power station

Overview

In June 2024 Highview Power secured the backing of the UK Infrastructure Bank and the energy industry leader Centrica with a £300 million investment for the first commercial-scale liquid air energy storage (LAES) plant in the UK.

In June 2024 Highview Power secured the backing of the UK Infrastructure Bank and the energy industry leader Centrica with a £300 million investment for the first commercial-scale liquid air energy storage (LAES) plant in the UK.

Highview Power is a long-duration [2] energy storage pioneer, specialising in liquid air energy storage (LAES). LAES stores excess renewable energy by cooling air to a liquid and then converting back to renewable energy when there is demand from the grid. It is based in England, with an office in.

Highview is a leading energy infrastructure business. We unite proprietary power systems analytics, world-class technologies and strategic finance to design, build and operate grid-scale assets that address the complex challenges faced by today's energy networks. Highview is working towards a world.

Global law firm White & Case LLP has advised Highview Power, a long-duration energy storage pioneer with proprietary cryogenic energy storage technology, on a £300 million combined debt and equity investment for the first in its pipeline of commercial-scale liquid air energy storage (LAES) plants.

Highview Power is a designer and developer of true long duration energy storage solutions for utilities and distributed power systems. The company's proprietary technology uses liquid air as the storage medium and its custom designed Liquid Air Energy Storage (LAES) solutions can deliver anywhere.

London-based Highview Power, a developer of large-scale energy storage solutions for utility and distributed power systems, has secured £300M (nearly €356.50M) from the UK Infrastructure Bank (UKIB) and British multinational energy and services company Centrica. The round also saw participation.

Energy storage power stations are predominantly owned by utility companies, 2. Independent power producers also play a significant role, 3. Certain projects are owned by private investors or consortiums, 4. Government entities occasionally

have stakes or ownership. The ownership of energy storage.
